PROFESSIONAL SUMMARY

Computer Engineering graduate from Kyung Hee University, South Korea under YTP-MARA scholarship and a Full-Stack Applied AI Engineer with professional experience building production web applications, backend integrations, authentication systems, SQL data workflows, and applied-AI solutions. Proficient in TypeScript, React, Next.js, Python, FastAPI, PostgreSQL, SQL Server, Docker, Supabase, and AWS. Experienced across modern and legacy production environments, including multilingual websites, loyalty platforms, AI-powered applications, and workflow automation. TOPIK Level 4 Korean proficiency with experience studying and working in international environments.

TECHNICAL SKILLS

- **Programming Languages:** Python, TypeScript, JavaScript, SQL, HTML/CSS
- **Frontend:** React.js, Next.js, Tailwind CSS, shadcn/ui, Internationalization (i18n)
- **Backend:** FastAPI, Django, NestJS, Node.js, Next.js Server Actions, ASP.NET Web Forms, PostgreSQL Functions/RPCs, REST APIs
- **AI / LLM:** LLM Integration, RAG, LangChain, Document Processing, Prompt Engineering
- **Databases:** PostgreSQL, MySQL, Supabase (Auth, SSR, RLS), Microsoft SQL Server
- **Cloud / DevOps:** AWS, Docker, CI/CD, Git, GitHub, Google Cloud
- **Testing & Quality:** Vitest, Playwright, React Testing Library, Postman
- **Automation / Platforms:** n8n, zapier
- **Languages:** Bahasa Malaysia, English, Korean (TOPIK Level 4)

WORK EXPERIENCE

Full-Stack Applied AI Developer

StratAgile Sdn Bhd | Cyberjaya, Malaysia | May 2026 – Present

- Develop and maintain production web applications across Next.js, React, TypeScript, Tailwind CSS, ASP.NET Web Forms, SQL Server, and Supabase environments across modern and legacy codebases.
- 1. **Keeklr** (<https://www.keeklr.com/>)
 - **Keeklr Web Application:** Engineered and refactored an 18-route Next.js application using React 19, TypeScript, and Tailwind CSS with reusable, feature-based components.
 - **Onboarding & Profile Settings:** Built multi-step onboarding, session-persisted state, live profile previews, notification settings, and 2-step account-deletion workflows.
- 2. **QRit Rewards & Loyalty Programs** (<https://ayamgepukmasrio.qrit.com.my/customer/join>)
 - **Loyalty Platform:** Developed and maintained an app-less F&B loyalty legacy system using ASP.NET Web Forms, MS SQL Server, and FTP-based deployment across 7 core

capabilities, including membership, rewards, redemption, campaigns, referrals, dashboards, and multi-outlet management.

- **Authentication & Security:** Redesigned customer authentication from 4-digit birth-date verification to a 6-digit SMS OTP flow, and incorporating secure cookies
 - **Marketing Data:** Designed SQL Server views and data transformations for marketing-ready customer datasets, including standardized Malaysian mobile numbers and controlled data exposure.
3. **Launch48 Client Websites** (<https://www.launch48.my/>)
- **Client Websites:** Built and maintained responsive client websites using Next.js, React, TypeScript, HTML/CSS, Tailwind CSS, and Supabase, supporting Git/GitHub-based development and production deployment
 - **Localization & SEO:** Implemented English and Bahasa Malaysia routes with language-specific page content and metadata to improve multilingual search visibility.
 - Contributed to the delivery and maintenance of 150+ client websites across multiple business categories.
4. **Perak FA Public Website** (<https://perakfa.com/>)
- **Built a bilingual Bahasa Malaysia/English football website** using Next.js App Router, React, TypeScript, and Tailwind CSS with localized routes, responsive season pages, fixtures, standings, FA Cup brackets, squad profiles, and official profiles.
 - **Integrated Supabase Auth and Supabase-backed football data** with email OTP, Google OAuth, session-aware rendering, profile completion, venue directions, ticket/livestream links, and Perak-focused fixture surfaces.
 - **Implemented SEO and performance features** including canonical/hreflang metadata, sitemap, robots.txt, Schema.org JSON-LD, adaptive background-video loading, poster fallbacks, and Vitest/Playwright test coverage.
5. **Perak FA Administration Dashboard**
- **Built a protected responsive football operations dashboard** using Next.js App Router, React, TypeScript, Tailwind CSS, and shadcn-compatible UI components for fixtures, standings, FA Cup management, and publication history.
 - Implemented Supabase SSR authentication, active-staff access control, searchable fixture management, a 16-team/15-tie FA Cup progression workflow, and a validated 14-team Liga A1 standings editor.
 - Designed atomic publishing with Supabase/PostgreSQL RPCs, audit history, restore workflows, locked bracket topology, targeted cache revalidation, website sync retry handling, and last-known data fallback.

EDUCATION

Kyung Hee University, Global Campus, South Korea

Bachelor's Degree in Computer Engineering | March 2022 – Feb 2026 | YTP-MARA scholar

- Award: Second Class Upper Honours
- Korean Language Proficiency (TOPIK): Level 4

- Relevant Courses: Full Stack Programming, Data Structures, UI/UX, Deep/Machine Learning, Cloud Computing

University of Kuala Lumpur, MIIT, Malaysia

Foundation in Science and Technology | July 2020 – Dec 2021 | YTP-MARA scholar

- Award: First Class Honours (CGPA: 3.92)
- Relevant Courses: Object-Oriented Programming, Java Programming, Virtual Machines

Sekolah Menengah Sains Sultan Haji Ahmad Shah, Pahang

Sijil Pelajaran Malaysia: 9As (5A+ 2A 2A-) | Jan 2015 – December 2019

SELECTED PROJECTS

DocuQuiz | AI-Powered Quiz Generation Platform

Tech Stack: TypeScript, JavaScript, Docker, AWS (EC2, Lambda, S3, RDS), Node.JS, CI/CD

- Engineered an AI-powered platform that converts uploaded PDF study materials into personalized quizzes and feedback.
- Designed RESTful API contracts for authentication, PDF upload, quiz generation, answer evaluation, and analytics reporting.
- Built backend services with NestJS, PostgreSQL, and Docker, with structured logging to support debugging and observability.
- Impact: Built robust data preparation workflows to cleanse and structure unstructured PDF documents, enabling accurate quiz generation and improving data reliability.

Business & Founder Lead Enrichment Automation

Tech Stack: JavaScript, n8n, Google Cloud, Google Places & Geocoding API

- Developed a workflow automation system using n8n to collect, enrich, and organize business lead data for prospecting.
- Integrated Google Geocoding and Places APIs to collect business data.
- Automated row insertion and status tracking in Google Sheets for downstream research and outreach.
- Impact: Reduced average lead-research processing from approximately 5 minutes to under 10 seconds per business by automating Places API enrichment and spreadsheet entry

LEADERSHIP

President, MARA Scholarship Students Association (KHU) | Feb 2022 – Feb 2026

- Coordinated administrative and welfare matters for 20+ Malaysian students; liaised with University's Office of International Affairs.
- Represented student concerns and helped resolve academic, administrative, and community-related issues between MARA and International Office of Kyung Hee
